

LOW PRESSURE MIXING HEADS FOR 2 – 6 COMPONENTS

- Mixing capacity from 0.5 g/shot - 50 kg/min
- Heated versions up to 150°C
- Automatic pressure regulation
- Solvent free mixing heads with:
 - Static-Roto Static or dynamic mixing system
 - Multi colour metering directly into the component line
- Dynamic mixing heads with:
 - Automatic cleaning for mixing chamber
 - Mixing rotor powered by servo motor
 - Valves for components equipped with or without recirculation system
 - Automatic pressure regulation
 - Special dynamic shaft seal for high back pressure application
 - Special flat film die for rotational casting systems
 - Multicolour and additive metering directly into the mixing chamber
