

2 – 4 COMPONENT LOW PRESSURE HOT CASTING MACHINE MINI MIX HOT

- Stainless steel material tanks with 5 - 15 Ltr. volume
- Temperature sensor and minimum level control
- Agitator with electric motor and variable speed
- Electric heated and insulated component chamber, max. temperature 130°C
- High precision metering pumps powered by stepper motors
- Flowrate up to max. 1.000 g/min
- Electronic delivery pressure control
- Free adjustable mixing ratios and flowrates
- Mixing head with static, roto static and dynamic mixer powered by servo motor with variable speed
- Vacuum unit with Woulfsche bottle
- SIEMENS touch panel
