

CENTRIFUGE

Centrifuge for production of technical articles

- Round chamber with integrated electric heating, max. 150°C
- Minimum temperature loss due too high quality insulation materials
- Hinged lid with insulation
- In gate opening installed in the centrifuge lid
- Lighted interior
- Work table for mould with max 500 mm diameter
- Mould height up to max. 300 mm
- Mould insert driven by electric motor with variable speed
- PLC control for automatic production process
