

AUTOMATIC PRODUCTION LINE FOR TPU SHEETS

- Production capacity up to 200 kg/hour
- 4-component low pressure hot casting metering- mixing and dispensing machine
- Colour pigment injection at the mixing head
- Automatic flushing for the mixing head
- Automatic mixing ratio control
- Integrated prepolymer conditioning equipment
- Continuous melting station for curative system
- Trough-type furnace with 25 mould carriers designed for 130°C operating temperature
- Special coated moulds for release agent free demoulding of the TPU sheets
- 3 axle CNC controlled support for the mixing head
- Automatic demoulding station for the TPU sheets by vacuum
