

MULTI-COMPONENT HOT CASTING MACHINE FOR PUR ELASTOMERE

- Stainless steel material tanks with 30 - 350 Ltr. volume, agitator and level control
- Electric heated, insulated and hot air forced component chamber, max. temperature 130°C
- High precision metering pumps powered by servo motors
- Free adjustable mixing ratios and flowrates
- Mass flow metering system to control and adjust the mixing ratio
- Mixing head with dynamic mixer powered by servo motor with variable speed
- Automatic flushing for mixing head
- Vacuum unit with Woulfsche bottle
- Micro dosing unit for colour and additives
- SIEMENS touch panel
